Age Refining Technology

*"Art is born
of the
observation
and
investigation of
nature."*

Cicero (106 BC–43 BC)

The Art of Young Living

Recovered accounts reveal that the most advanced civilizations of the ancient world, the Egyptians, Greeks, Romans and Chinese, relied upon the immense power of essential oils to regain, increase, or maintain health of the body and mind. Young Living is restoring this lost wisdom and helping people understand that essential oils and aromatherapy can do much more than soothe, invigorate, and uplift.

Based upon advanced scientific research, Young Living has combined the health secrets of the ages with the latest age refining technology to produce a groundbreaking anti-aging skin care system—A•R•T.

*“By combining the timeless knowledge of essential oils
with the latest skin care technology,
Young Living has produced a system that will
revolutionize the industry and provide
extraordinary results.”*

*Our passion for purity, quality, and
integrity guarantees your skin will benefit
from the very best.”*

Assessing Skin Damage

Through the ages, the beauty of the human form has inspired artists, and the very essence of that beauty is illuminated through a face. The delicate bone structure, natural features, and unique attributes help shape the human face and distinguish appearance. But, perhaps even more brilliant than the architecture of the human face is the soft, smooth, exquisite skin tone that makes a face so extraordinary, and so unforgettable.

Like any work of art, the natural process of aging can have a negative affect on the texture, tone, and appearance of skin. As we age, our skin is repeatedly exposed to harmful chemicals and damaging sunlight. Over time, this exposure causes significant damage to DNA and eventually, the skin starts to thin, age spots appear, and uneven skin tone and wrinkle formation result. In fact, persistent DNA damage is the primary cause of aging on the skin.

Aging also weakens the body's ability to produce collagen. The dermis, which lies just beneath the top layer of your skin, consists of cells called fibroblasts that produce collagen. As skin matures, fibroblasts lose the ability to produce collagen, which causes the epidermis, or top layer of skin, to thin. As a result, deeply-bedded wrinkles occur.

The collagen layer generates healthy skin cells faster for smoother, more supple skin.

To actually restore your complexion's vibrant, youthful appearance, you must enhance your body's natural ability to repair DNA. Young Living has

The Beauty of A•R•T.

ART:

*The conscious production
or arrangement of
sounds, colors, forms, movements,
or other elements
in a manner
that affects the sense of beauty.*

A superior concept in skin restoration, Young Living's A•R•T, Age Refining Technology, combines DNA recovery enzymes – an advanced science – with a proprietary Peptide Complex, to reduce the look of fine lines, wrinkles, and age spots, even skin tone, and increase the elasticity and density of your skin.

What's more, recognizing the incredible power of essential oils, Young Living has added frankincense and sandalwood for their ability to replenish DNA. Add the moisturizing and skin conditioning properties of the wolfberry seed oil, and you have the formula for a truly unique and effective skin care system.

Once again, Young Living has taken the finest ingredients and combined them with the latest skin care technology to create a system that enhances your skin's natural ability to rebuild DNA and restore youthful looking skin.

Age Refining Technology is the Art and Science of Skin Care.

Key Features

1. Promotes superior skin recovery with two innovative enzymes, and a proprietary blend of pure essential oils, which can enhance DNA recovery and reduce premature aging of the skin.

- **Photolyase:** Light-activated and suitable for day use. This enzyme uses light to enhance your skin's ability to replenish DNA segment in the damaged cell.
- **Endonuclease:** Uses energy in your body to cut damaged DNA segment, reproduce the original segment before damage, and insert the new segment back into the correct place in the cell's DNA structure.
- **Essential Oils Frankincense and Sandalwood:** Support and sustain the skin's ability to renew DNA.

Before treatment

A combination of aging and sun exposure will damage DNA and inhibit the production of collagen, elastin and moisture in the skin. This results in dry, rough, uneven skin texture with noticeable fine lines and wrinkles.

After treatment

Treating the skin with A·R·T delivers DNA recovery enzymes and essential oils, while stimulating the production of collagen and elasticity to help smooth, plump and soften skin. A·R·T produces dramatic and noticeable results.

2. Reduces the look of fine lines, wrinkles and age spots by enhancing the collagen and elastin.

- Delivers a revolutionary Peptide Complex that includes Matrixyl™ 3000, which helps increase the density of the skin by producing collagen I, III, IV and fibronectin by a factor of at least 200%.
- Provides Vitamin C which, when combined with Matrixyl, produces a 50% greater increase in skin matrix regeneration than the Peptide Complex alone.
- Contains the legendary wolfberry seed oil for added moisturizing properties.

3. Advanced delivery technology ensures skin is getting the maximum benefit and a more efficient application.

- Laminar phase technology delivers an equal amount of the active ingredients along the surface of the skin and forms a barrier that allows greater penetration and efficacy. This same barrier also retains moisture and protects the skin from the environment.
- Advanced Liposome technology delivers ingredients faster and in greater concentrations to the lower layers of the skin.

Gentle Foaming Cleanser

- Gently cleans the skin without irritation or dryness, and does not contain any harsh astringent such as alcohol.
- Powerful foaming action for luxurious feel and efficient application.
- Leaves skin feeling clean, hydrated, and soft.

Day Activator and Night Reconstructor Creams

- Photolyase and Endonuclease enzymes provide the perfect balance by continually reinforcing your body's ability to replenish DNA for a more complete, and more effective skin care system.
- Delivers a proprietary blend of pure essential oils to help sustain DNA renewal activity day and night.
- An exclusive Peptide Complex, featuring Matrixyl 3000 and Vitamin C, improves elasticity and increases the thickness of the skin.
- Contains the legendary wolfberry seed oil for maximum hydration.
- Σ Water-based creams absorb quickly and leave skin feeling smooth, hydrated and supple.
- Essential oils create a natural, light, refreshing fragrance.

A·R·T Purifying Toner – NEW!

A necessary step in any comprehensive skin care regimen, Young Living's Purifying Toner helps support cleansing by removing unwanted oil, dirt and impurities that can accumulate on skin. Utilizing the benefits of the pure essential oils frankincense and sandalwood, known for their ability to visibly revitalize skin, the Purifying Toner helps smooth and soften skin, enhance pH balance, minimize oily shine, and reduce the appearance of pores. This remarkable formula will also help energize, refresh and purify the skin's surface to restore a firm and healthy-looking complexion.

Recommended Use

Shake well before use. After cleansing, sweep over face with a cotton ball. Can be used in the morning and again in the evening. For best results, apply the A·R·T Day Activator or Night Reconstructor cream over the Toner.
